Pininfarina designed Grove Granite shown at Auto Shanghai 2019 together with Grove Obsidian SUV

- ▶ **Zero Emission Hydrogen Prestige Transportation**
- ▶ **Stylish Pininfarina designed 5 door Coupe featuring range over 1,000km range from single tank**
- ▶ **Luxury 5 seat SUV featuring range over 1,200km**

April 17th, Shanghai.

Wuhan Grove Hydrogen Automobile Co., Ltd. today showed two new vehicles destined for production in the near term featuring zero emission Hydrogen Fuel Cell Power and impressive driving range from a single tank.

Designed by Pininfarina, the Granite is a striking sporty 5 door coupe, designed to combine a driver orientated design with a high level of comfort and prestige. The Granite offers an all new concept of Green long distance travel, this offers a broad appeal from the executive perspective during work days or enjoying life in the city or open road.

As the first product from Grove's design studio in Barcelona working with the Grove Development Headquarters in Wuhan China, the Obsidian, the Wagon variant of the Obsidian Sport, was released recently in Wuhan and is also on display at Auto Shanghai.

Grove Granite

The Granite, following the naming convention representing the strength of rock but the source of the Earth, is both powerful yet kind to the earth.

Like the recently previewed Grove Obsidian Sport the Granite brings to the emission free world a sporty driver oriented car that is capable of travelling up to 1,000 km on a Single Tank, refillable in only a few minutes.

Designed by the legendary Italian Design house Pininfarina, the Granite is the 3rd car on Grove's large car platform, shared with the Obsidian and Obsidian Sport models. This platform offers exceptional comfort. With a wheelbase over 3 metres long and a Carbon Fibre body and frame it remains athletic and offers a sporty feeling at the same time.

The design of the Interior reflects both the sports orientation, the motorsport style driver focused cockpit allowing the driver to feel at one with the car. Simultaneously the luxurious comfort that is associated with the ability of the Granite to cover long distances. The interior design features Carbon fibre with gold flecks throughout, featuring unique diamond style controller the feeling for all occupants is unmistakably prestigious.

The Exterior of the car reflects this spirit as much outside as it does within, stars light the way and blaze a trail in the lights and unique body lighting systems, boldly highlighting the dynamic sporty lines of the instantly recognisable Pininfarina shape.

Unveiled proudly by Pininfarina Chairman, Paolo Pininfarina both he and Grove believe this car will become a major force in the China and Global car market in the years to come from it's launch planned in 2021.

Grove Obsidian

The Obsidian SUV was introduced to the public for the first time today, following on from the Launch of the Obsidian Sports in Wuhan in March. The wagon has a classical Space friendly layout and a powerful design which announces the arrival of significance is about to take place.

At over 5.1 meters the car offers ample space for its 5 occupants in both style and comfort, the show model Butterfly Door concept offering a unique view deep inside the striking twin tone interior which reflects the energy of movement so gracefully provided by the Grove Drivetrain.

Where the Obsidian Sport has a very athletic line to the body the Obsidian SUV offers a strong dignified presence, the Design team in Barcelona have created this as a statement that the time of Grove and the time of Hydrogen has arrived and that this is a proud time.

The obsidian offers a a new level of luxury inside the car also. High quality leather surrounds the passengers from all sides, our design aims to reduce weight using high quality light weight materials while at the same time support materials are designed to offer an extremely high level of comfort.

Aside from the ultimate security provided by the Motorsport style Carbon Fibre Frame, the Obsidian is designed as a 5 star safety performer. With advanced airbags and highly advanced Automated Braking, lane keeping and cruise systems the proactive safety in the car is at the top of the class.

A special feature of the Obsidian show car is that it is alive. When asleep it's lights and its instrument panels rest, offering a peaceful flow of energy through the cabin into the distance and look from the face. When bought to life the eyes open, the instruments rise and the Obsidian is ready for serious travel.

The Obsidian is designed for roaming the world, while being green at heart with zero harmful emissions this car is capable of a stunning 1,200km from a single fill of Hydrogen, our sophisticated hybrid system combined with the weight saving materials in the body and throughout the drivetrain allow this car unparalleled range and reduce the number of times required to visit refuelling stations

Grove as part of the IGE group, a leading hydrogen production and distribution company, will approach the market with a comprehensive city by city approach. Starting in several cities in 2020, and a rapid expansion through 2021 and beyond Grove will bring points for sale and product experience, aftersales centres and hydrogen distribution in a combined approach to bring the entire concept of Hydrogen motoring to stunning life.

Grove enters first the China market, following quickly into Australia, New Zealand and Brazil and will quickly work towards expansion into other markets in line with Hydrogen strategies for each.

Grove is a brand of the Grove Hydrogen Automotive Company Limited, registered in Wuhan, China. Born in 2016 and Registered in 2018 under parent company Institute of Geosciences and Environment (IGE). Operating Design and Development in Wuhan and Barcelona Spain, with Production Facilities in Wuhan and several other locations to be announced during 2019 Grove is a Global car company aiming to offer a truly clean Automotive experience from Manufacturing to enjoyment of the car.
